## RELEVANT ACTIVITIES/PROJECTS

---

- Japanese Olympiad in Informatics 2016 Finalist when in High School, placed in the top 80th out of over 1000 participants in a nation-wide competitive program contest
- Created CNN-based musical onset detector using Japanese rhythm game "Taiko: Drum Master" ([A report](#) and [the source code](#) is available) by using Fourier Transforms to generate a mel-scale spectrogram to perform image analysis
- Carried out a research on evaluation of several solutions of Rubik's Cube when in High School, with Monte Carlo method program written in C++
- Working to code C compiler in C from scratch as a hobby. So far, it can compile basic arithmetics, external function calls with arguments, function definition, and branching. Repository: <https://github.com/woodyZootopia/woodycc>
